

## Membership Card Changes

The next time you renew your SCCA membership there will be a change, your card will come with your picture already on it, much like the pro hard cards. But, and there always seems to be a “but”, your membership information maintained by the SCCA must have a photo in their data base. If you do not have a photo in the SCCA data base it is not hard to add one. Go to the SCCA website and click on “member login” (green box in the upper right); this will take you to a box where you enter your SCCA Member Number and password. If you haven’t been to this site you will need to create a password. The next screen will show your membership information and at the top left is where you can add your photo or change the photo that is already there.

Now when you renew your membership you will receive a card with your photo. Also it is wise to check your membership information occasionally to make sure it is correct and if not you can easily update.

If you have any questions let “Membership” know, [membership@scca.com](mailto:membership@scca.com)
